

Assembler Directives

Instructions for assembler
(define macros, initialize memory, etc.)

```
#include "avr/io.h"  
;-----  
.global LCD_write  
.global init_ADC
```

#include

Include supporting files (e.g., header files)

.global

Defines global variables or subroutines

.set

Define local variables used in code

.byte

Reserves byte (in SRAM or EEPROM) to a variable

.ascii

Reserves string (in SRAM or EEPROM)

.equ

Define constants to be used in code

```
msg: .ascii "ADC 8-bit value:"
```

⋮

```
.equ delayVal, 10000
```
